• **Best Practices No 1:**

1. Title of the practice :- The study of Nature

2. Goal:

- To make students aware about the importance of saving the forest.
- To create awareness about the nature and environment.
- To make students know the importance of wild animals, trees and various medicinal plants.

3. Context:

The forests are important for the health and well-being of people, wildlife and our planet. They are home to roughly two-thirds of all land dwelling plants and animal species. But unfortunately deforestation is increasing day by day. In order to fight against catastrophic climate change and global warming we have to stop deforestation. Our institution is situated in the forest area. There is a sanctuary Katepurna 2 km away from the college. The people of this area know the forest but do not understand the importance of trees and the forest. The villagers used to cut the trees for cooking. So the college tries to prevent them from cutting the trees through our students.

4. Practice:

Every year at the beginning of the session, the college organizes the Nature study tour to the Katepurna forest. Near about 75 to 100 students participate in the tour. The forest officers and guards guide the students and provide information of various types of trees, medicinal plants, wild animals etc. and also make students understand the importance of preservation of forest.

5. Evidence of success:

- Due to this practice there is a decrease in cutting the trees.
- Plantation programmes are arranged in the college campus as well as in the village.
- The students got familiar with the nature and various plants like Nirguda, Raktachandan, Ghuyira, Gunj, Arjun etc.
- Students became aware about the forest and wilderness.

6. Problems Encountered:

- A tour in the forest is a risky programme.
- Due to lack-ness of enough human resources, it becomes really difficult to keep watch on every student while wandering in the forest.
